PROFESSIONAL SUMMARY

Computer Engineering student graduating in 2028 with hands-on experience in full-stack development, backend APIs, and workflow automation. Built real-world software using JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, and SQL, including API and third-party integrations. Currently focused on AI application development, prompt engineering, Python, and n8n automation, with a strong interest in building AI-powered business workflows and assistants.

EDUCATION

Bachelor of Engineering, Computer Engineering **2028**
Trinity Academy of Engineering, Pune - Savitribai Phule Pune University (SPPU)

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3, Java
AI & Automation: n8n, Prompt Engineering, AI/ML Fundamentals, AI Application Development
Backend & APIs: Node.js, Express.js, REST APIs, HTTP, JSON, JWT Authentication, Multer
Databases & Tools: MongoDB, MySQL, Git, GitHub, Postman, Vercel, Netlify, PostgreSQL/Prisma
Frontend: React.js, Next.js, Tailwind CSS, PostgreSQL/Prisma

PROJECTS

RecoverAI - AI-Powered Revenue Recovery Automation Agent: *(JavaScript, Node.js, Express.js, PostgreSQL, Prisma, REST APIs)*

- Built an AI-oriented revenue recovery workflow that analyzes failed payment transactions, diagnoses failure reasons, estimates recovery potential, and recommends interventions.
- Designed a pipeline combining transaction data, AI recommendations, deterministic recovery policies, and API-driven execution to automate recovery decisions.
- Implemented validation and testing for risk classification, failure diagnosis, recovery recommendations, and workflow outcomes.

PrintMate - Smart Cloud Printing & Workflow Automation Platform *(Next.js, Node.js, Express.js, MongoDB, Razorpay, Raspberry Pi)*

- Built an automated document-printing workflow covering QR-based upload, OTP verification, payment processing, order tracking, and kiosk execution.
- Integrated REST APIs, payment services, WhatsApp notifications, real-time order tracking, and Raspberry Pi automation for an end-to-end print process.
- Built an admin dashboard for kiosk and order management and tested the MVP against real-world operational requirements.

n8n Email Automation Workflow *(n8n, Automation Workflow, Email Integration)*

- Built and tested a basic n8n workflow to automate email notifications, gaining hands-on experience with workflow nodes, data flow, and execution testing.
- Currently extending the workflow with API/webhook-based integrations and more robust error handling for interview-ready business automation use cases.

EXPERIENCE

Freelance Full Stack Web Developer - Self-Employed **2026 - Present**

- Developed and deployed responsive client applications using React.js, Next.js, Node.js, and Express.js, translating business requirements into technical workflows.
- Integrated databases, authentication, REST APIs, notifications, and third-party services while troubleshooting integration and application issues.
- Worked directly with clients to gather requirements, identify operational needs, and deliver maintainable software solutions.

LEADERSHIP & ENTREPRENEURSHIP

- **Founder, PrintMate:** Building and validating an automated smart printing solution for educational institutions, combining cloud software, payment processing, real-time order management, and Raspberry Pi kiosk automation.

Areas of Interest: AI & Automation, Backend Engineering, Full-Stack Development, Cloud Computing, Distributed Systems.
Languages: English, Hindi, Marathi
